

ADARSH SINGH

Bengaluru, India | +91-7492003695 | adarsh2001gop@gmail.com | [LinkedIn](#)

Agentic AI Developer with hands-on experience building RAG pipelines, multi-agent systems, and LLM-powered applications using Python, LangChain, and Azure — focused on delivering autonomous, production-ready AI solutions.

TECHNICAL SKILLS

Languages & Query: Python, SQL, C++

Agentic AI & LLMs: Agentic AI, Multi-Agent Systems, LLMs, LangChain, LangGraph, Transformers, Prompt Engineering, Agent Reasoning Patterns, RAG

AI / ML Frameworks: PyTorch, TensorFlow, Sci-Kit Learn, NLP, OpenCV, OCR

Cloud & Deployment: Microsoft Azure (Databricks, ADF), GCP (Vertex AI, BigQuery), Docker, REST APIs, FastAPI

Data & Vector Stores: ETL Pipelines, Data Transformation, Azure Databricks, Vector Databases, Distributed Data Processing

Dev Practices: Agile, CI/CD, Git, Microservices, MLOps

Visualization & BI: Power BI, Matplotlib, Seaborn, Tableau

Soft Skills: Problem-Solving, Stakeholder Communication, Team Collaboration, Fast Learner, Adaptability

PROFESSIONAL EXPERIENCE

Analyst – Agentic AI & Data Engineering | Capgemini

Aug 2025 – Present

- Designing and integrating **Retrieval-Augmented Generation (RAG)** pipelines to enhance data querying, **document understanding**, and insight generation on large structured financial datasets.
- Building automated ETL pipelines and data transformation workflows using **Python** and **Azure Databricks** for an enterprise-scale Financial Data Lake (FDL) BI engagement.
- Developing **Python**-based **REST API** services and Power BI dashboards, delivering data-driven insights to both technical and non-technical stakeholders.
- Working with **Azure** cloud-native services for scalable **distributed data processing** and deploying ML models into production environments.

Software Engineering Intern – Python & RAG | Capgemini

Apr 2025 – Jun 2025

- Developed **Python**-based backend services and integrated **RAG pipelines** to power intelligent **document retrieval** and automated response generation.
- Built and tested **FastAPI** and **REST API** endpoints, contributing to end-to-end AI feature delivery in an **Agile** sprint environment.
- Gained hands-on experience with **prompt engineering**, **agent reasoning** patterns, and **vector database** integration for LLM-powered features.

PROJECTS

Agentic AI Platform – Multi-Agent RAG System

Aug 2025 – Jan 2026

- Designed and built a **multi-agent** orchestration system using Agentic AI and **LangChain/LangGraph** patterns, enabling **autonomous reasoning** and tool use across multiple data sources.
- Implemented **RAG pipelines** for real-time knowledge retrieval and dynamic response generation, integrating **vector database** lookups with **LLM inference**.
- Built an **LLM-powered chatbot** agent for automated customer support — reducing manual query response time by 60% through intelligent routing and retrieval.
- Architected a **distributed microservices** backend with REST APIs, **Docker**, and WebSocket for real-time event-driven AI responses at scale.

Tech Stack: Python, LangChain, LangGraph, Agentic AI, RAG, LLMs, Vector DB, Docker, REST APIs, WebSocket

Intelligent Email Campaign Automation with OpenAI

Jan 2025 – Mar 2025

- Built a **Python**-based AI automation tool integrating **OpenAI API** for LLM-driven **prompt engineering** and personalised content generation at scale.
- Developed **REST API** backend with automated scheduling, template management, and real-time campaign analytics via **Google Sheets API**.

Tech Stack: Python, OpenAI API, FastAPI, Google Sheets API, Matplotlib, SMTP

Indian Sign Language Real-Time ML Translation System

Mar 2025 – Jul 2025

- Built a real-time **ML inference pipeline** for Indian Sign Language (ISL) to text and speech using TensorFlow and **OpenCV**, with **OCR**-assisted pre-processing.
- Optimised model inference for **low-latency** real-time processing and deployed the service as a **REST API** for cross-platform consumption.

Tech Stack: Python, TensorFlow, OpenCV, NLP, OCR, Google TTS

CERTIFICATIONS

• AI-102: Designing & Implementing Azure AI Solutions – Microsoft	Expires Mar 2029
• AWS Certified AI Practitioner – Amazon Web Services	Expires Mar 2029
• Generative AI Leader Certification – Google Cloud	Expires Dec 2028
• Professional Cloud Developer Certification – Google Cloud	Expires Jan 2028
• AZ-900: Microsoft Azure Fundamentals – Microsoft	Jan 2026
• AI-900: Microsoft Azure AI Fundamentals – Microsoft	Sep 2025

ACHIEVEMENTS

- Advanced to **Top 500** (Idea Submission) in Tata Imagination Challenge 2024, clearing Aptitude, Gamified, and General Awareness rounds.
- Competed among **50,000+** participants in TATA Crucible Campus Quiz 2024 and TVS Credit E.P.I.C 6.0 (IT & Analytics track).
- Cleared AFCAT and CDS written examinations multiple times, competing against **5 Lakh+** candidates.

EDUCATION

Lovely Professional University Master of Computer Applications – Computer Science CGPA: 8.35	Jalandhar, India Aug 2023 – Jul 2025
Deen Dayal Upadhyay Gorakhpur University Bachelor of Science – Mathematics & Computer Science 61.28%	Gorakhpur, UP, India Apr 2018 – Sep 2021
A.H. Intermediate College Intermediate (PCM) 70%	Deoria, India Apr 2017 – May 2018
Co-operative High School Matriculation 74%	Bihar, India Apr 2015 – May 2016
